

Code structure

The theme is using the following structure:

```
<!DOCTYPE html>
<html>
  <head>
    <!-- meta information, stylesheets, icons, title -->
  </head>
  <body>
    <div class="navbar-fixed">
      <!-- navigation -->
    </div>
    <main>
      <!-- remaining web-site: nav, sections, modals and footer -->
    </main>
    <footer>
      <!-- footer -->
    </footer>
    <div class="curtains" id="curtains">
      <!-- the container that's being animated when changing pages -->
    </div>
    <!-- scripts go after the main container and just before the closing
body tag -->
  </body>
</html>
```

DOCTYPE and html tag

<!DOCTYPE html> is a way to declare your file as HTML5 and [<html>](https://developer.mozilla.org/en/docs/Web/HTML/Element/html) (<https://developer.mozilla.org/en/docs/Web/HTML/Element/html>) is the root of your document.

head

The head tag includes a lot of important tags, like:

- [The HTML element \(https://developer.mozilla.org/en/docs/Web/HTML/Element/meta\)](https://developer.mozilla.org/en/docs/Web/HTML/Element/meta) represents any metadata information that cannot be represented by one of the other HTML meta-related elements
- [The stylesheets \(https://developer.mozilla.org/en-US/docs/Web/HTML/Element/link#Including_a_stylesheet\)](https://developer.mozilla.org/en-US/docs/Web/HTML/Element/link#Including_a_stylesheet) of Animate.css, FullPage, PagePiling and Materialize libraries, as well as Linea icons stylesheet and the main stylesheet
- Special tags to add [favicons \(https://github.com/pimmeypava-docs/wiki/09-Favicons\)](https://github.com/pimmeypava-docs/wiki/09-Favicons) to the site
- The [<title>](https://developer.mozilla.org/en-US/docs/Web/HTML/Element/title) (<https://developer.mozilla.org/en-US/docs/Web/HTML/Element/title>) tag

body

Body includes all of your site elements, like navigation, main container where all the pages are gonna be loaded and footer.
