Navigation

There are two types of navigation you can use:

Classic

```
<nav>
    <div class="nav-wrapper">
        <div class="container">
            <div class="row">
                <div class="col s12">

                    <!-- Classic navigation, visible on desktop only-->
                    <ul class="hidden hide-on-med-and-down">

                        <!-- List item containing dropdown element, notice
.dropdown-button class -->
                        <li>
                            <a class="dropdown-button" data-
activates="dropdown-index" data-beloworigin="true" data-hover="true">Index</a>
                        </li>

                        <!-- Normal link, without dropdown -->
                        <li>
                            <a class="ajax-link" href="#/about">About</a>
                        </li>
                    </ul>

                    <!-- Dropdown content, notice the id that matches data-
activates value -->
                    <div class="dropdown-content" id="dropdown-index">
                        <ul>
                            <!-- Dropdown list item -->
                            <li>
                                <a class="index-link underline" href="index-
classic-menu-light.html">Light &amp; classic</a>
                            </li>
                        </ul>
                    </div>

                    <!-- Medium/mobile slide out navigation-->
                    <ul class="side-nav" id="slide-out">

                        <!-- Side nav dropdown menu item-->
                        <li class="no-padding">
                            <ul class="collapsible collapsible-accordion">
                                <li>
                                    <!-- Dropdown header with title -->
                                    <a class="collapsible-header">Index</a>
```

```
                                        <!-- Dropdown body, containing a list of
items -->
                                        <div class="collapsible-body">
                                            <ul class="collapsible-body-list">
                                                <li>
                                                    <a href="index-classic-menu-
light.html">Light &amp; classic</a>
                                                </li>
                                            </ul>
                                        </div>
                                    </li>
                                </ul>
                            </li>

                            <!-- An ordinary side nav link item -->
                            <li>
                                <a class="ajax-link" href="#/about">About</a>
                            </li>
                        </ul>

                        <!-- Logo/brand name visible on desktop only on the right
side -->
                        <span class="right hide-on-med-and-down">
                            <span class="logo">Vava</span>
                        </span>

                        <!-- Logo/brand name visible on medium screens and down on
the left side -->
                        <span class="left show-on-medium-and-down hide-on-large-
only">
                            <span class="logo">Vava</span>
                        </span>
