Service icons

```
<div class="col s12 l4 margin-on-medium-and-down">
    <i class="icon-basic-cloud"></i>
    <div class="expertise-title">Cloud solutions</div>
    <div class="expertise-description grey-text text-lighten-1">Lights great
darkness fourth bring seed fruit together.</div>
</div>
```

We've created a useful [mapping for the Linea icons (http://linea.pimmey.com)](http://linea.pimmey.com).

Price box

```
<div class="col s12 l4 margin-on-medium-and-down">
    <div class="price-box">
        <h4>Beginner</h4>
        <div class="price"><sup>$</sup>19</div>
        <div class="divider flow-text"></div>
        <ul class="flow-text">
            <li>5 users<span class="info tooltipped" data-position="right"
data-delay="50" data-tooltip="The number of allowed users">?</span></li>
            <li>Optimisation</li>
            <li>Caching</li>
            <li>Automation<span class="info tooltipped" data-position="top"
data-delay="50" data-tooltip="Involves Gulp commands">?</span></li>
            <li>Validation</li>
            <li>Linting</li>
            <li>&mdash;</li>
            <li>&mdash;</li>
        </ul>
        <a class="btn-large btn-flat waves-effect waves-dark">Buy</a>
    </div>
</div>
```

Tooltips must be initialised:

```
$('.tooltipped').tooltip({
    delay: 50
});
```

FAQ [accordion (http://materializecss.com/collapsible.html#accordion)](http://materializecss.com/collapsible.html#accordion)

```
<ul class="collapsible flow-text" data-collapsible="accordion">
    <li>
        <div class="collapsible-header active">
            <span class="grey-text text-lighten-2">&mdash; </span> Is the
starter pack really free?
        </div>
        <div class="collapsible-body">
            <p>A cattle she'd creepeth. That light make. Void two they're,
can't us don't creepeth. Fruitful there herb from signs she'd created whales
them. Lights which face. Divided they're first. Dry wherein own itself green
it.</p>
        </div>
    </li>
</ul>
```

And the Javascript initialisation:

```
$('.collapsible').collapsible({
    accordion: false
});
```

Team member

```
<div class="col s12 m6 l3 margin-on-medium-and-down">
    <img class="responsive-img rhombus-clip"
src="./assets/images/team/annie.jpg" alt="Annie" />
    <div class="name">Annie Redhat</div>
    <div class="title grey-text text-lighten-1">CEO</div>
</div>
```

Philosophy [tabs (http://materializecss.com/tabs.html)](http://materializecss.com/tabs.html)

To create tabs, use the following structure:

```html
<div class="col s12">
    <ul class="tabs">
        <li class="tab col s4 m3 l2">
            <a href="#philosophy-1">
                <h5>Discover</h5>
                <span class="philosophy-number">1</span> <!-- this is needed
for smaller screens, when the title is too wide -->
            </a>
        </li>
        ...
    </ul>
</div>
<div class="tab-contents">
    <div id="philosophy-1" class="col s12">
        <h5>Discover</h5>
        <p class="flow-text">Two for make behold form creature image She'd,
waters forth, itself Blessed morning so sea midst, in tree make i bring sixth
moved darkness bearing. Meat itself light created spirit under sea man.</p>
    </div>
    ...
</div>
```

Tabs also require initiation:

```javascript
$('ul.tabs').tabs();
```
